Ergonomic Comfort

Ergonomics is applying science to the design of equipment to increase productivity by reducing operator fatigue.

This science has been applied to these wheelchairs with the introduction of ergonomic seating. Ergonomic seating will make the operator more comfortable allowing them to remain active longer.

Traditional Seating

Ergonomic Seating

Ergonomic chairs are designed with your comfort in mind. Those of you who have spent long periods of time in traditional “L” shaped seating wheelchairs know that they can become uncomfortable and make you feel stiff after a while. With that in mind, ergonomic chairs introduce the newly designed “S” style seating. “S” style means that these chairs have contoured seating that better fits the curves of the human body. The “S” style seating also helps prevent pressure sores, relieve existing pressure sores, makes the chair more stable, and will keep you from sliding out of the chair. The benefits do not stop there; the upholstery also has a permanent antimicrobial barrier that will help fight odor, stains and skin deterioration from bacteria, fungus, and other microorganisms. Even the armrests have been redesigned on this chair; ergonomic chairs have done away with the traditional flat armrests and replaced them with concaved armrests that curve with the shape of your arm and are much more comfortable to rest your arms on. Your travel worries are over because these chairs weigh less than 30 lbs!! Not only will these chairs fold in half like most standard wheelchairs, but the backrest will fold down making it easy to lift and put into even the smallest cars. Don't delay, own yours today!!

Features:

- All models weigh less than 30 lbs.
- Anti-Bacterial Upholstery is removable for easy cleaning
- Chair folds in half and backrest folds down
- Armrests are concaved making them more comfortable than traditional chairs
- “Tube-in Center” foot-plate assures better side leg support and more natural positioning than traditional chairs
- 24” Rear spoke, polyurethane, high profile wheels
- Included pocket on the backrest of the chair
- Unique style that is anything but institutional

Benefits:

Anti-Bacterial, removable,
and washable upholstery

Arms are concaved and 1”
wider than other chairs

Chair folds in half and
backrest folds down

Ergonomic Seating is more
comfortable, helps prevent
stress, sores, and slipping
